

In the Claims

Kindly substitute the following amended claim 1 for pending claim 1:

1. (amended) A method of printing a document with an automated banking machine, comprising the steps of:

- (a) conducting at least one transaction with the machine;
- (b) storing transaction data corresponding to the transaction in a memory in operative connection with a computer, wherein the computer is operatively connected with the machine;
- (c) accessing a first markup language document with a browser operating in the computer, wherein the first markup language document includes at least one print instruction; and
- (d) printing indicia corresponding to the transaction data in the memory with a printer in the machine responsive to the print instruction included in the first document.

2. (amended) The method according to claim 1 wherein the first markup language document includes instructions therein corresponding to a format, and wherein in step (d) the indicia is printed in accordance with the format.

8. (amended) The method according to claim 1 and further comprising the steps of:

- #6
- e) providing a plurality of markup language documents accessible through a server, said documents including the first document, and a second document wherein the second document includes at least one second print instruction;
 - f) accessing the second markup language document with the browser;
 - g) printing indicia corresponding to the transaction data in memory with the printer in the machine responsive to the second print instruction included in the second document.

14. (amended) An automated banking machine including:

#7

a plurality of transaction function devices, the transaction function devices including a printer and an input device;

a computer in operative connection with the transaction function devices and a memory, wherein the computer includes software executable therein, wherein the software includes a browser;

wherein the software is operative to cause the computer to store in the memory

Cont
A7

transaction data representative of at least one input to an input device, and wherein the software is operative to cause the browser to access a markup language document including at least one print instruction and to operate the printer to print an item responsive to the print instruction and the transaction data.

Kindly add the following new claims:

15. (newly added) An automated banking machine including:

a plurality of transaction function devices, the transaction function devices including a printer and an input device;

a computer in operative connection with the transaction function devices and a memory, wherein the computer includes software executable therein, wherein the software includes a browser;

wherein the software is operative to cause the computer to store in the memory transaction data representative of at least one input to the input device, wherein the software is operative to cause the browser to access a plurality of markup language documents through a server, the plurality of markup language documents including a first document and a second document, wherein the first document includes at least one first print instruction and the second document

includes at least one second print instruction, and wherein the software is operative to cause the printer to print a first item responsive to the first print instruction included in the first document and at least a portion of the transaction data, and wherein the software is operative to cause the printer to print a second item responsive to the second print instruction included in the second document and at least a portion of the transaction data.

16. (newly added) The machine according to claim 15, wherein the first document includes indicia in a first language and the second document includes indicia in a second language, and wherein the first printed item includes indicia corresponding to at least a portion of the transaction data in the first language and the second printed item is includes indicia corresponding to at least a portion of the transaction data in a second language.

17. (newly added) An automated banking machine including:

a plurality of transaction function devices, the transaction function devices including a printer and an input device;

a computer in operative connection with the transaction function devices and a memory, wherein the computer includes software executable therein, wherein the software includes a browser;

wherein the software is operative to cause the computer to store in the memory transaction data representative of at least one input to the input device, and wherein the software is operative to cause the browser to access at least one markup language document including at least one print instruction and to operate the printer to print a check responsive to the print instruction and at least a portion of the transaction data.

18. (newly added) An automated banking machine including:

a plurality of transaction function devices, the transaction function devices including a printer and an input device;

a computer in operative connection with the transaction function devices and a memory, wherein the computer includes software executable therein, wherein the software includes a browser;

wherein the software is operative to cause the computer to store in the memory transaction data representative of at least one input to the input device, and wherein the software is operative to cause the browser to access at least one markup language document including at least one print instruction and to operate the printer to print a wagering slip responsive to the print instruction and at least a portion of the transaction data.

19. (newly added) The machine according to claim 14, wherein the at least one markup language document includes instructions therein corresponding to a format, and wherein the item includes indicia corresponding to at least a portion of the transaction data, which indicia is printed on the item in accordance with the format.

20. (newly added) The machine according to claim 14, wherein the transaction function devices include a cash dispenser, wherein the software is further operative to cause the cash dispenser to dispense an amount of cash.

21. (newly added) Computer readable media bearing instructions which are operative to cause at least one computer in the automated banking machine to cause the automated banking machine to carry out the method steps recited in claim 1.

22. (newly added) Computer readable media bearing instructions which are operative to cause at least one computer in the automated banking machine to cause the automated banking machine to carry out the method steps recited in claim 8.

23. (newly added) Computer readable media bearing instructions which are operative to cause at least one computer in the automated banking machine to cause the automated banking machine to carry out the method steps recited in claim 12.

24. (newly added) Computer readable media bearing instructions which are operative to cause at least one computer in the automated banking machine to cause the automated banking machine to carry out the method steps recited in claim 13.
